

User stories & User case diagram

PortflloGenie system

1. User (Main Actor)

Authentication

- As a user, I want to **create an account**, so that I can save and manage my portfolio.
- As a user, I want to **log in**, so that I can access my portfolio and data.

GitHub Integration

- As a user, I want to **connect my GitHub account**, so that my projects and activity are imported automatically.
- As a user, I want to **view GitHub stats**, so that I can showcase my coding activity.

Portfolio Creation

- As a user, I want to **choose a portfolio template**, so that my portfolio looks professional.
- As a user, I want to **add skills**, so that I can highlight my expertise.
- As a user, I want to **add projects**, so that I can showcase my work.

Portfolio Management

- As a user, I want to **preview my portfolio**, so that I can review it before publishing.
- As a user, I want to **regenerate my portfolio**, so that I can improve or update its content/design.
- As a user, I want to **view my portfolio progress**, so that I know how complete my portfolio is.
- As a user, I want to **improve my portfolio visibility**, so that recruiters can find me easily.

- As a user, I want to **view example portfolios**, so that I can get inspiration for my own.

Publishing & Exporting

- As a user, I want to **download my portfolio**, so that I can use it offline or share it.
- As a user, I want to **publish my portfolio**, so that it is available online to others.

□ 2. Admin

- As an admin, I want to **view system analytics**, so that I can monitor platform performance.
- As an admin, I want to **view user statistics**, so that I can track the number of users and growth.
- As an admin, I want to **monitor portfolio status**, so that I can see how many portfolios are published, draft, or generated.
- As an admin, I want to **track user activity**, so that I can understand user behavior and engagement.

🔌 3. GitHub (External System)

(You don't always have to write this, but adding it makes your work stronger 🙌🙌)

- As the system, I want to **retrieve repositories from GitHub**, so that user projects are displayed automatically.
- As the system, I want to **fetch GitHub statistics**, so that user activity is visualized in the portfolio.
